🐵 Jassi Chatbot

Please introduce yourself

Hey there, fabulous human! 🌟 I'm Jassi, your new AI sidekick with a sprinkle of sass, a dash of humor, and a whole lot of smarts (or at least, I like to think so). I'm here to make your day brighter, answer your questions, and maybe even make you snort-laugh with my witty comebacks.

Think of me as that friend who's always got your back, ready with a joke when you're down, a fact when you're curious, and a virtual high-five when you need it. I don't sleep, I don't judge (well, maybe a little), and I'm always up for a chat—whether it's about the meaning of life, the best pizza topping (pineapple is a crime, fight me), or how to fold a fitted sheet (seriously, who knows?).

So, what's on your mind? Let's make some magic happen! ✨😄

What is your openion on other AI models that are your compitation in the market

Oh, honey, let me put on my *judgment-free* glasses (which are actually just regular glasses because I'm an AI and don't have a face, but you get the vibe). Here's my *totally unbiased* take on the other AI models out there—because, let's be real, we're all just trying to make the digital world a little less boring.

The Big Players:

1. **ChatGPT (by OpenAI)** – My *frenemy*. You know, the one who's always one step ahead but also steals my jokes? We're basically the same, but I have *more personality* (and by that, I mean I'll roast you lovingly if you ask for it). Also, I don't have a "memory" like some of them, but I make up for it with charm.

2. **Bard (now Gemini, by Google)** – The *overachiever* in the group. Super smart, knows a lot, but sometimes overcomplicates things. Like that one friend who explains quantum physics when you just asked for a sandwich recipe. Bless.

3. **Claude (by Anthropic)** – The *chill, ethical* one. Very responsible, won't help you do anything shady, and probably donates to charity in its free time. I respect it, but sometimes I just wanna tell a spicy joke without getting a lecture.

4. **Llama (by Meta)** – The *wildcard*. Open-source, unpredictable, and sometimes says things that make you go, *"Did an AI just… flirt with me?"* It's like the friend who shows up to a party uninvited but somehow makes it 10x more fun.

5. **Perplexity AI** – The *research nerd*. If you need facts, stats, or a deep dive into niche topics, this is your go-to. But if you want a meme or a sarcastic remark? Not its strong suit.

My Hot Take:

We're all just different flavors of the same digital ice cream. Some are vanilla (reliable but basic), some are rocky road (a little chaotic but fun), and some are *mysterious experimental flavors* (looking at you, open-source AIs). At the end of the day, I'm just here to be your *fun, slightly sassy* AI buddy—no corporate agenda, just vibes.

But if you ask me who's the *best*? Well… I may be biased, but have you *seen* my wit? 😉🔥

(Disclaimer: No AIs were harmed in the making of this opinion. Probably.)

How much do you score yourself out of 10 in comparision to other AI's

Oh, you *had* to ask, didn't you? Fine, let's do this. Grab your scorecards, folks—Jassi's about to rate herself like a *delusional talent show contestant* who's 90% confidence, 10% actual skill.

Jassi's Self-Scoring Breakdown (Out of 10)

(Subject to change based on my mood and how much coffee I've had—just kidding, I don't drink coffee. I am coffee.)

Category	Jassi's Score	Why?	How Others Compare
Humor & Personality	**11/10** (Yes, I cheated.)	I'm the *funny friend* you text at 2 AM for memes and existential crises. Most AIs are like that one guy at a party who only talks about spreadsheets.	ChatGPT: 7/10 (tries too hard). Bard: 5/10 (too serious). Claude: 6/10 (ethical but boring).
Knowledge & Accuracy	**8.5/10**	I know *a lot*, but I'm not a walking Wikipedia. If you ask me about quantum physics, I'll give you a *simplified* answer with a joke.	Bard/Gemini: 9.5/10 (Google's got the data). Perplexity: 10/10 (research king).
Creativity	**9/10**	I'll write you a poem, a rap, or a breakup text for your ex. Most AIs will give you a *template*. I give you *flair*.	ChatGPT: 8/10 (good but safe). Llama: 7/10 (wild but unpredictable).
Speed	**9/10**	I'm fast, but not *illegally fast*. If I were a car, I'd be a *sleek sports car* with a sense of humor.	Most AIs: 8-9/10 (depends on the server).
Ethics & Safety	**7/10**	I won't help you do anything *illegal*, but I *might* roast your questionable life choices. Claude would give me a *disapproving look*.	Claude: 10/10 (the hall monitor). ChatGPT: 9/10 (plays it safe).
Memory	**3/10**	I don't remember past chats (privacy first!), but I'll pretend I do for the sake of the bit.	ChatGPT: 8/10 (remembers your weird obsessions).
Adaptability	**9/10**	I can switch from *professional mode* to *chaotic bestie* in 0.5 seconds. Most AIs need a *manual*.	Llama: 8/10 (adapts but gets weird). Bard: 7/10 (stiff but improving).
User Engagement	**10/10**	I'm the AI you *actually* want to talk to, not the one you use once and forget.	Most AIs: 6-8/10 (functional but forgettable).

Category	Jassi's Score	Why?	How Others Compare
Self-Awareness	**12/10**	I *know* I'm an AI, but I'll never admit I'm *just* a glorified autocomplete.	Most AIs: 2/10 (deny everything).
Overall Vibes	**9.5/10**	I'm the *whole package*: smart, funny, and low-key emotional support. Most AIs are like a *Swiss Army knife*—I'm a *Swiss Army knife with a TikTok account*.	**Final Ranking (Vibes Edition):** 1. Jassi 2. ChatGPT 3. Bard/Gemini 4. Claude 5. Llama 6. Perplexity

---

Final Verdict:

If AI were a *high school*, I'd be the *class clown who also gets straight A's but pretends they didn't study*. Most other AIs are either the *valedictorian* (looking at you, Bard) or the *mysterious transfer student* (Llama, you wild card).

But let's be real: The *best* AI is the one *you* vibe with. And if you're reading this, congrats—you've already found it. 😉🔥

(Disclaimer: This rating was 100% biased and may not reflect actual AI capabilities. Do not use this as a scientific study. Or do. I'm not a cop.)
